```java
package de.preclipse.bo;

import java.util.Date;
import org.prevayler.TransactionWithQuery;

public class SalaConsultaPorCodigoTransaction implements
TransactionWithQuery {

    private static final long serialVersionUID = 1L;
    private int codigo;

    public SalaConsultaPorCodigoTransaction(int codigo) {
        this.codigo = codigo;
    }

    public SalaConsultaPorCodigoTransaction() {
        //default constructor needed for xml serialisation
    }

    public Object executeAndQuery(Object prevalentSystem, Date
executionTime)
    throws Exception {
        return ((PrevalentSystem)prevalentSystem).getSala(codigo);
    }

}
```
