```java
package de.preclipse.bo;

import java.util.Date;
import org.prevayler.TransactionWithQuery;

public class ClasseConsultaPorCodigoTransaction implements
TransactionWithQuery {

    private static final long serialVersionUID = 1L;
    private int codigo;

    public ClasseConsultaPorCodigoTransaction(int codigo) {
      this.codigo = codigo;
    }

    public ClasseConsultaPorCodigoTransaction() {
      //default constructor needed for xml serialisation
    }

    public Object executeAndQuery(Object prevalentSystem, Date
executionTime)
          throws Exception {
            return ((PrevalentSystem)prevalentSystem).getClasse(codigo);
    }

}
```
